## Quarz 2015

### Technical data

- Alcohol content: 14.0 %vol.
- Residual sugar: 1.8 g/l
- Total acidity: 6.5
- Acidity: --
- PH: --
- SO2: --
- FSO2: --

### Prizes

|                                   |           |
|-----------------------------------|-----------|
| Robert Parker's Wine Advocate     | 93 points |
| Guida essenziale ai Vini d'Italia | 95 points |
| Gambero Rosso - Vini d'Italia     | 3 glasses |
| James Suckling                    | 92 points |
| I Vini di Veronelli               | 93 points |

"Delicate as the fine inclusions of quartz in Terlan's volcanic porphyry rock – that is our Sauvignon Selection, which does full justice to its name. Quarz offers a combination of fine texture, depth and salty aftertaste that has given this noble white an international reputation."

Rudi Kofler

### Wine

- Name: Quarz
- DOC denomination: Alto Adige Terlan
- Variety: 100% Sauvignon Blanc
- History: first vintage 1990
- Vintage: 2015
- Bottles produced: 58.000
- Yield: 42 hl/ha
- Quality line: The selections

### Production area

- Country: Alto Adige Terlan DOC
- Provenance Alto Adige
- Altitude: 250 - 900 m a. s. l.
- Slope: 5 - 70 %
- Orientation: South - Southwest

### Wine character

- Color: brilliant straw yellow
- Smell: This Sauvignon is enticingly exotic in the glass, with multilayered fruit of mango, papaya, lime and red grapefruit, and herbal aromas reminiscent of lemon grass, lemon balm, mint and green tea. It also reveals mineral notes of flint combined with a hint of elderberry syrup.
- Taste: On the palate, the wine offers a fascinating interplay of juicy fruit aromas and delicate minerality creating a harmonious opulence with a long and impressive finish.

### Simple pairings

An exciting companion to oysters, salmon tartare and crudités of shellfish, as well as green apple risotto with crispy fried char filets, poached lobster or roast lamb in a herb crust with poached asparagus; mature goat's cheese.

### Detailed pairings

White Terlan asparagus risotto with Tropea onions and balsamico vinegar - Giancarlo Perbellini (Ristorante Perbellini)

### Cellaring and tasting advice

- Storage advice: Cool storage at constant temperatures, high level of humidity, good ventilation and as little light as possible
- Cellar temperature: 10 - 15 °C
- Minimum maturity: 6 years
- Serving temperature: 12 - 14 °C
- Suggested glass: Burgundy glass

## *Selection* Quarz 2015

### Vintage: 2015

2015 will go down in the history of viticulture as hot and dry but generally a good year. As a result of a combination of high temperatures and low levels of precipitation, the water supply to the vines was at the lower limit, and the vines produced loose clusters of small grapes – ideal conditions for top quality wines.

New shoots appeared on the vines towards the end of March and beginning of April. Spring brought both a little rain and numerous days with above-average temperatures. The vines made correspondingly rapid progress, and by mid-May the first inflorescences started to blossom. In the following weeks, summer consolidated its hold and the warmest June on record for South Tyrol was followed by a July with more record temperatures and numerous nights with temperatures above 20°C. That slowed down the ripening process in the lower-level vineyards and harmonized the vegetation stages on all the sites. Irrigation measures were taken to avoid desiccation and negative effects in terms of quality. Lignification proceeded quickly and well, and the ripening of the grapes also made fast progress. Thanks to the sunny days of late summer, it was possible to start harvesting the grapes at the end of August already. The biggest challenge at this point was choosing the ideal date for the harvest to ensure that the grapes had achieved phenolic maturity and offered a good balance between sugars and acidity.

Harvest date  
25 August 2015

Rainfall  
538.7 mm

Hours of sunshine  
2078

Temperature  
12.4 °C

### Wine making procedure

- Description: Manual harvest and selection of the grapes; gentle whole cluster pressing and clarification of the must by natural sedimentation; slow fermentation at a controlled temperature and aging on the lees for nine months partly in big wooden barrels (50%) and partly in stainless steel tanks (50%); blending three months before bottling.

### Soil

The vineyards are located at between 250 and 900 meters above sea-level on a bed of striking red porphyry, an igneous rock with large mineral inclusions known as quartz porphyry in geological terminology. This terroir is home to salty wines with a fine tension to intrigue the palate plus outstanding longevity. The south-facing slopes receive maximum sunshine. Under these almost Mediterranean conditions, a wide range of grape varieties flourish, while in Terlano itself various Mediterranean plants like olive, pomegranate, cypress and almond trees are to be found. The warm days and cool nights of the ripening period are the key to a high sugar content, intensive aromatics and the typical Alpine freshness of the wines.

In addition to "Alto Adige DOC" as the geographic designation of origin for Alto Adige, the wines are additionally labeled "Terlano" in recognition of the specific climatic and geological character of the terroir. The term "Terlaner classico" is used for those grape varieties that grow in the traditional wine-growing area between Andriano, Nalles and Terlano.

## Climate

The high peaks of the main Alpine chain protect South Tyrol from the Atlantic winds and cold northerlies, while the region benefits from the Mediterranean climate from the south. That explains the pronounced differences between day- and night-time temperatures, which are the key to full maturity and elegant wines.

To the south, a number of mountain massifs like the Adamello also have a protective function. As a result, annual precipitation is only about one-third of the average for the southern Alpine foothills, and the number of hours of sunshine is higher. The climatic conditions are not unlike those to be found in wine-growing areas like the Swiss Canton Valais.

When the sun rises behind the mountains east of Terlano on one of the year's 300 sunny days, it is already high in the sky as the wine-growing area has a westerly to southwesterly exposure. The lower atmospheric density permits more direct solar irradiation with less diffuse sunlight. That increases the difference between the slopes on the sunny and shady sides of the valley.

Microclimate in Terlano  
Continental climate (Cfa Köppen-Geiger)

Annual sunshine hours: ø 2135  
Maximum temperatures: 38,2 °C  
Average temperatures: 12,9 °C  
Minimum temperatures: -10,7°C  
Annual precipitation: ø 558 mm  
Average global radiation: 150,1 W/m<sup>2</sup>  
Winds:  
- North foehn: cool and dry down-slope wind  
- Ora: valley wind system from the south, bringing in air from the Po Valley
