Selection

Winkl 2018

Technical data

- Alcohol content: 13.5 %vol.
- Residual sugar: 1.9 g/l
- Total acidity: 6.1
- Acidity: --
- PH: 3.2
- SO2: --
- FSO2: --

Prizes

This wine has not been awarded yet

"Winkl is a juicy, delicately fruity, minerally Sauvignon Blanc, which has been produced as a varietal wine since 1956. In the Terlan DOC area, this grape variety has long been grown with excellent results in the oldest vineyards."
Rudi Kofler

Wine

- Name: Winkl
- DOC denomination: Alto Adige Terlan
- Variety: 100% Sauvignon Blanc
- History: first vintage 1956
- Vintage: 2018
- Bottles produced: 210.000
- Yield: 56 hl/ha
- Quality line: The selections

Production area

- Country: Alto Adige Terlan DOC
- Provenance Alto Adige
- Altitude: 250 - 900 m a. s. l.
- Slope: 5 - 70 %
- Orientation: South - Southwest

Wine character

- Color: intensive straw yellow with a delicate green shimmer
- Smell: Ripe fruit aromas of apricot, mandarin and passion fruit mingle with elements of elderberry, nettle and mint.
- Taste: The fruitiness continues on the palate in combination with a fine acidity. The wine scores with a good structure and a minerally but at the same time aromatic finish.

Simple pairings

An interesting combination in spring with boiled white asparagus in Bolzano sauce as well as with steamed green asparagus; also with tuna carpaccio, smoked salmon and raw langoustines; and a typical South Tyrolean choice with nettle dumplings, as well as poached trout with vegetables or young goat's cheese.

Detailed pairings

Foam of white Terlan asparagus with quail eggs and bitter almond - Giancarlo Perbellini (Ristorante Perbellini),

Char on white asparagus, pea stock, mint and char roe - Norbert Niederkofler (Ristorante St. Hubertus)

Cellaring and tasting advice

- Storage advice: Cool storage at constant temperatures, high level of humidity, good ventilation and as little light as possible
- Cellar temperature: 10 - 15 °C
- Minimum maturity: 1 years
- Serving temperature: 10 - 12 °C
- Suggested glass: Glass for a young white wine

Selection Winkl 2018

Vintage: 2018

2018 could be defined as "extreme"- from a meteorological point of view- because it was characterized by a snowy winter and a rainy March, conditions that allowed an excellent water supply for the vines. Due to cooler temperatures in early spring, new shoots on the vines appeared in mid-April, later than the previous year. However, the continuation of the season was marked by an almost summery climate, alternating with heavy rainfall, which ensured rapid phenological development of the vines- first inflorescences started blossoming at the end of May. A hot June ended with a strong hailstorm, causing damage in some of our vineyards. Damage that our producers promptly repaired with great diligence and commitment. The months of July and August were characterized by a great heatwave without precipitation, interrupted by heavy rains in early September. As in 2017, the harvest began on 22 August. Overall, the vintage is satisfactory both in terms of quantity and quality of the wines produced.

Harvest date
22 August 2018

Rainfall
778.6 mm

Hours of sunshine
1952

Temperature
12.9 °C

Wine making procedure

- Description: Manual harvest and selection of the grapes; gentle whole cluster pressing and clarification of the must by natural sedimentation; slow fermentation at a controlled temperature in stainless steel tanks, aging on the lees partly in stainless steel tanks (80%) and partly in big wooden barrels (20%) for 5-7 months; blending one month before bottling.

Soil

The vineyards are located at between 250 and 900 meters above sea-level on a bed of striking red porphyry, an igneous rock with large mineral inclusions known as quartz porphyry in geological terminology. This terroir is home to salty wines with a fine tension to intrigue the palate plus outstanding longevity. The south-facing slopes receive maximum sunshine. Under these almost Mediterranean conditions, a wide range of grape varieties flourish, while in Terlan itself various Mediterranean plants like olive, pomegranate, cypress and almond trees are to be found. The warm days and cool nights of the ripening period are the key to a high sugar content, intensive aromatics and the typical Alpine freshness of the wines.

In addition to "Alto Adige DOC" as the geographic designation of origin for Alto Adige, the wines are additionally labeled "Terlano" in recognition of the specific climatic and geological character of the terroir. The term "Terlaner classico" is used for those grape varieties that grow in the traditional wine-growing area between Andriano, Nalles and Terlan.

Climate

The high peaks of the main Alpine chain protect South Tyrol from the Atlantic winds and cold northerlies, while the region benefits from the Mediterranean climate from the south. That explains the pronounced differences between day- and night-time temperatures, which are the key to full maturity and elegant wines.

To the south, a number of mountain massifs like the Adamello also have a protective function. As a result, annual precipitation is only about one-third of the average for the southern Alpine foothills, and the number of hours of sunshine is higher. The climatic conditions are not unlike those to be found in wine-growing areas like the Swiss Canton Valais.

When the sun rises behind the mountains east of Terlano on one of the year's 300 sunny days, it is already high in the sky as the wine-growing area has a westerly to southwesterly exposure. The lower atmospheric density permits more direct solar irradiation with less diffuse sunlight. That increases the difference between the slopes on the sunny and shady sides of the valley.

Microclimate in Terlano
Continental climate (Cfa Köppen-Geiger)

Annual sunshine hours: ø 2135
Maximum temperatures: 38,2 °C
Average temperatures: 12,9 °C
Minimum temperatures: -10,7°C
Annual precipitation: ø 558 mm
Average global radiation: 150,1 W/m²

Winds:

- North foehn: cool and dry down-slope wind
- Ora: valley wind system from the south, bringing in air from the Po Valley
